Statistical Review and Evaluation for Pre-Licensure Submissions

OBPV/DB

October 20, 2026

Executive Summary:

Background:

Primary Objective(s):

Design Features:

- **Study population:**
- **Treatment Allocation and Randomization:**
  - **allocation ratio**
  - **stratification factors:**
- **Blinding:**
- **Treatment Arms:**
  - **experimental:**
  - **control:**
- **Site(s):**
- **Other features:**

Endpoints:

- **Primary:**
- **Secondary:**

Statistical Hypothesis:

Analyses for Primary Endpoint(s):

- **Primary analysis:**
  - **statistical method:**
  - **covariates or strata**
  - **analysis set**
  - **missing data handling:**
  - **α-level:**
- **Sensitivity/supportive:**
- **Subgroup analysis:**

Analyses for Other Important Endpoint(s):

- **Primary analysis:**
  - **statistical method:**
  - **covariates or strata**
  - **analysis set**
  - **missing data handling:**
  - **α-level:**
- **Sensitivity/supportive:**
- **Subgroup analysis:**

Interim Analyses:

- **Adaptive features:**
- **Number of interim looks:**
- **Statistical method/approach:**
- **Timing and boundaries at each look:**
- **Operating characteristics:**

Sample Size Estimation:

- **Number of subjects to be accrued/evaluated:**
- **Type-I error rate (one or two-sided):**
- **Power:**
- **Assumed values in the estimation:**
  - **Treatment effect size:**
  - **Standard deviation:**
  - **Dropout/missing rate:**
  - **Others:**
- **Rationale provided for assumed values:**
- **Number of events required to stop/complete the trial:**
- **Calculation verification:**

Other Aspects:
